Current EIMSED Needs Assessment

for: ASiM/University of Nebraska Medical Center

Needs Assessment for Europe, South America and Asia on retinal disease focusing on Age related Macular Degeneration (AMD), Diabetic Macular Edema (DME), Retinal Vein Occlusion (RVO including CRVO & BRVO)

April – August 2014

"Personalized medicine" - more than a "phrase"!

Ideally, the patient undergoes a better treatment. Health budgets can be saved and pharma companies are offering new and innovative drugs.

This is not as easy, only a strong cooperation between all stakeholders guarantees a feasible implementation.

Well defined needs assessments and trainings are necessary to transfer this new methods and treatments.

EIMSED -Scientific study on Medical Education and Continuing Medical Education (CME) in Europe

The scientific study on Medical Education and Continuing Medical Education (CME) in Europe serves not only as a book of reference for accreditation criteria and relevant factors of the health care system, but allows a tailor-made, individualized educational design and a continuous quality improvement. The compendium was realized in co-operation with White Cube Health Care.
